

## **INSTITUTIONAL DISTINCTIVENESS**

Since the inception of the college in the year 1958, it has been accepting challenge to create an academic environment amongst the new generation of adjoining hinterland and also students from distant areas. The other two colleges located nearby are quite far off and our institution caters to a geographical area, the population of which is mostly engaged in Agriculture and other related livelihoods. The primary aim of Bagnan College is to produce honest, aware and truly educated citizens of the country who will place the good of the country and society over their personal well-being. Our aim is to produce citizens who are respectful to the tradition and culture of the country, aware of their social relevance and importance, and above all, confident and able to earn their livelihood.

The distinctiveness of the institution is embedded in its principles of diffusing noble inspiration and culture amongst the neighbouring villagers, specifically to cater for educational interests of the public at large and to promote and encourage advancement of Arts, Science and Commerce education and to empower women and weaker sections by providing quality education through equal opportunities.

It is also important and pertinent to control and balance the mindset of the first generation learners and other students from urban fringe to culminate into a sense of competitive but healthy bondage. This institute is distinctively designed to build a support system among first-generation students and other students including minority and other backward communities. Being a co-educational college and located in a rural area, it is a healthy sign that the ratio of female to male students is gradually rising.
